

LSR-Vis Reset series

Five hundred new logos built only from what has worked: a clean, wide wordmark, mostly in italics, with one small, clear mark. Twenty-five marks, twenty versions of each. Star the ones you like, then use Copy shortlist to send me the codes. Click any logo to see it on a truck door, a field ticket, a hard hat and as an app icon.

500 LOGOS 25 MARKS 4 LAYOUTS 18 TYPEFACES 8 INKS

KEPT FROM W444

Michroma and the wide faces near it, set in italics. A small mark at the top right of the name. About a third of the set is in Michroma itself.

KEPT FROM W452

A bubble beside the name, now drawn as a true aphron: round, every layer centered, as in the cross-section.

KEPT FROM #059

The well path with aphrons rising off both the vertical and the horizontal sections, alone and as a badge.

LEFT OUT

The aphron as the dot of the i, the L drawn as a well, and the lateral running under the name.
